DETAILED ACTION

Response to Arguments

1. Applicant's amendment to the claims has obviated the 102(b) rejection the previous office action

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 24, 26, 27 and 30-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant in the last line of claim 24 refers to variable Q. However, variable Q is not used in the genus. Thus the claim is confusing. Appropriate correction is required.

Double Patenting

4. Claims 24, 26, 27 and 30-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 and 11-13 of U.S. Patent No. 6,626,197. For reasons see previous office action.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1621

6. Claims 24, 26, 27 and 30-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Sullivan (Journal of Organic Chemistry (1963), 28(9), 2381-5).

Sullivan discloses the following compound:

See page 2382 formula XV(+). The compound anticipates the claims when

$R_1=R_2=R_3=R_4=R_5=R_6=X=$ H alkyl which is optionally substituted. Please note the compound itself reads on the pharmaceutical composition claims. The recitation of a pharmaceutical composition for treating diabetes has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1621

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
